PROBLEM STATEMENT

To systematically evaluate and improve employee performance within an organization by leveraging Microsoft Excel as a tool for data analysis. The goal is to develop a comprehensive performance analysis model that facilitates data-driven decision-making and supports the organization's objectives of enhancing employee productivity and satisfaction.

MODELLING

1. **Data Collection:**

   - **Sources:** Performance reviews, KPIs, attendance records, productivity metrics, and feedback.

   - **Process:** Gather and compile data into a structured format.

2. **Feature Collection:**

   - **Features:** Employee ID, department, job title, performance ratings, sales figures, project metrics, attendance, productivity, peer reviews, and self-assessments.

3. **Data Cleaning:**

   - **Tasks:** Validate data accuracy, standardize formats, normalize values, remove duplicates, and correct errors.

4. **Performance Level:**

   - **Assessment:** Define metrics, calculate performance scores, categorize levels, and analyze trends to identify high and low performers.
5. **Summary:**

   - **Overview:** Summarize key findings, visualize data with charts and dashboards, and provide actionable recommendations for improvement.

RESULTS

EMPOLYEE PERFORMANCE ANALYSIS

RESULT

conclusion

The "Employee Performance Analysis using Excel" project successfully leverages Microsoft Excel to provide a detailed, data-driven approach to evaluating and improving employee performance. By systematically collecting, cleaning, and analyzing performance data we executed the project.
